

# HOW TO CLEAN

## BATHROOM MIRRORS & VANITY AREA

1

### PUT AWAY LOOSE ITEMS

Remove all loose items from your vanity table. Do a thorough wipe with a damp cloth of all your items before placing them under the sun to dry and eliminate mold/odor.

2

### BRUSH & DUST DIRT & DEBRIS

Use tools such as dusters to brush away dirt on your vanity counter. You may use a vacuum cleaner too.

Do not miss the corners and upper surfaces of cabinets and shelves.

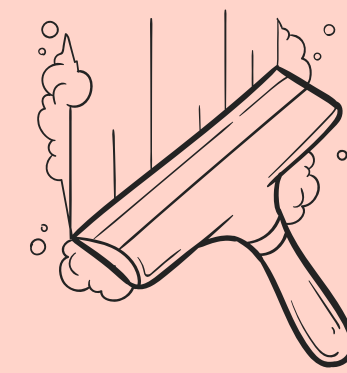

3

### WIPE DOWN & DRY WELL

With disinfecting soap and water, wipe the area well.

It is important to ensure that your cloth is damp but not dripping wet, to avoid damaging your furniture.

4

### CLEAN THE MIRRORS

First, wipe the mirror edges with a damp cloth. Then, spray glass cleaning liquid over the mirror surface. Lastly, use a squeegee to swipe down the mirror. Tada! Now you have a sparkling mirror!
